Find Your Kids' SIZE

Align your child's heel with the solid line at the base of the chart. The line that touches his or her longest toe indicates the correct size. The shorter lines in between the numbered lines indicate half sizes. Since many children have feet of different sizes, it's important to measure both feet. You should purchase shoes in the larger of the two sizes.

Find Your Kids' WIDTH

When measuring your child's right foot, align his or her instep with the solid line on the left side of the chart. If the outside of the right foot reaches the grey area on the right, consider a wide width. Repeat with the left foot: align the instep with the solid line on the right side of the chart. If the outside of the left foot reaches the grey area on the left, consider a wide width.
